Public consultation

27 March 2012

Draft amendment to Continuing professional development registration standard and Guidelines on continuing professional development for endorsed and non-endorsed optometrists

Introduction

The Optometry Board of Australia (the Board) is undertaking a public consultation process on proposed amendments to its:

1. Continuing professional development registration standard.
2. Guidelines on continuing professional development for endorsed and non-endorsed optometrists.

Section 38 of the National Law empowers the Board to develop, and recommend to the Australian Health Workforce Ministerial Council (the Ministerial Council), registration standards to deal with issues relevant to the eligibility of individuals for registration in the optometry profession or the suitability of individuals to competently and safely practise the profession.

The Board may also develop and approve codes and guidelines to provide guidance to optometrists in accordance with section 39 of this law.

The Board has developed and previously consulted on a range of registration standards that have now been approved by the Ministerial Council. The approved standards can be accessed at www.optometryboard.gov.au under Registration Standards.

The National Law requires the Board to undertake wide-ranging consultation on the content of proposed registration standards and guidelines.

The amended standard is found at attachment A with a summary of the changes at attachment B. The amended guidelines are at attachment C.

At the completion of the consultation on the content of the registration standard, the Board will recommend them to the Ministerial Council, with any amendments deemed appropriate arising from the submissions received in the consultation process.

A link to the National Law is available at www.ahpra.gov.au under Legislation and publications.

Making a submission

The Board invites interested parties to address their written comments on the content of the amendments to the standard and guidelines to Mr Colin Waldron, Chair, Optometry Board of Australia by COB Friday 18 May 2012.

Electronic submissions are preferred and can be made at optomconsultation@ahpra.gov.au.

Submissions can also be posted to: Mr Colin Waldron, Chair, Optometry Board of Australia, GPO Box 9958, Melbourne VIC 3001.

Please note that all submissions received will be published on the Board’s website unless indicated otherwise in your submission.
Introduction

The Optometry Board of Australia (the Board) has drafted a series of amendments to its Continuing professional development registration standard and Guidelines on continuing professional development for endorsed and non-endorsed optometrists, following an extensive review by the Board’s Continuing Professional Development Accreditation Committee.

The Board has established the Continuing Professional Development Accreditation Committee to advise the Board on matters relating to the requirements for continuing professional development (CPD), and the criteria and quality processes used in the accreditation of CPD activities.

The Board has reviewed the standards and guidelines now, earlier than the committed 2013 date, as there are significant amendments and issues that need to be clarified for practitioners prior to registration renewal in November this year.

To delay the review of the standard would continue to restrict the range of CPD activities available to optometrists in meeting the Board’s requirements. The amendments will be of particular benefit for rural and remote practitioners.

The amendments do not increase any requirements but rather provide clarity and improved flexibility for optometrists so they may easier meet the requirements.

Background

The objectives of the National Registration and Accreditation Scheme (the National Scheme) are to provide for protection of the public by ensuring that only optometrists who are suitably trained and qualified to practise in a competent and ethical manner are registered, and to facilitate the provision of high-quality education and training of optometrists. In order to ensure that only suitably qualified and competent practitioners are registered, the Board is required to develop a CPD standard.

The Board encourages optometrists to view CPD as an integral part of practice, and not simply a hurdle requirement for registration purposes.

The Board recognises that CPD is a highly individual undertaking and that optometrists differ in skills and interests. With this in mind, the Board has revised the activity types available to optometrists in meeting the requirements so as to increase flexibility of choice for individuals and better articulate the quality standards that the Board expects for activities.

For accreditation of CPD activities, providers will be required to develop activities in line with the Board’s accreditation framework. This includes guidance on developing key elements such as learning objectives and multiple choice questions. The Board has provided this accreditation framework to assist optometrists in their choice of quality activities to meet their individual CPD needs.

In the development of CPD activities, considerable importance should be placed on the recognition that most optometrists have differing areas of professional interest and CPD should target optometrists’ requirements. The delivery of the learning content must be with meaning and purpose to
an optometrist's internal desire to learn, and be applicable immediately to their respective work setting. Adults want to know that what they are learning is going to help them do their job.\textsuperscript{1,2}

Adult learning theory and research suggest that effective CPD activities should progress from the didactic approach for all forms of CPD and seek new avenues of effective presentations for the adult learner.\textsuperscript{3} Such concepts might include the creation of more interactive online seminars, hands-on learning opportunities, peer-based study groups, and small group breakout sessions during large lecture-based presentations, as well as increasing the variety of educational topics at large symposiums.\textsuperscript{4,5} Focus groups have confirmed that adult learners want face-to-face, web-based and collegial kinds of learning opportunities embedded into professional learning.\textsuperscript{6,7} Active, engaged learning is the hallmark of effective, applicable and transferable CPD.\textsuperscript{8}

By revising the CPD documents, the Board believes that optometrists will have increased flexibility to assist them in developing an individual CPD plan. At the core of this flexibility is interaction with peers across a range of delivery modes. The Board has also been conscious to allow for new technologies to be incorporated into the accreditation framework over time.

**Key changes**

The Board has incorporated the following key changes into the registration standard and guidelines:

1. **Incorporate a two-year rollover for requirements**

Prior to the introduction of the National Scheme, optometrists were required to meet the CPD requirements of the Optometrists Association of Australia as a condition of membership. This program had run for six years and allowed optometrists to meet the minimum requirements over a two-year period.

In response to significant concern and feedback, the Board, as a transition arrangement, amended its CPD policy to allow for the accumulation over two years. These amendments now need to be incorporated into the registration standard.

In the amendment, the Board has been conscious not to reduce the minimum requirements but to introduce a level of flexibility and responsiveness that the profession had been used to.

The Board was particularly conscious of rural and remote practitioners who had faced difficulty in meeting the requirements in 12 months.

The Board is interested in encouraging and supporting optometrists meet the requirements for CPD and to foster a positive culture to ongoing learning for the ongoing benefit of the public. The two-year rollover removes a perceived barrier in the profession.

\textsuperscript{1} Cardiff School of Education (2002). The continuing professional development of teachers in Wales: international and professional contexts. University of Wales Institute, Cardiff and the PPI Group, Cardiff.

2. Remove the exemption for new graduates

The current guidelines exempt new graduates from all CPD requirements for the first 12 months of registration.

The Board has removed this exemption in consultation with the profession including education providers, the professional association and key employer groups.

A pro-rata provision remains for those new graduates registered for only part of a registration year.

3. Simplification of activity types to increase clarity and understanding for optometrists

The current registration standards and guidelines have elements of duplication and inconsistency across the two documents.

The registration standard has been reviewed to remove elements that describe how to meet the requirements with these elements listed in the guidelines only.

The guidelines have been reviewed to include clearer guidelines on accredited and non-accredited activities, the different activity types accepted and the point weighting for these activities.

4. Incorporate amendments into the guidelines previously considered by the Board in the development of the CPD FAQs or CPD provider manual

Since the introduction of the National Scheme, the Board has received feedback on key issues in the guidelines including issues on non-accredited activities and assessment.

As the Board has considered these issues, it has provided clarification in its Frequently Asked Questions and CPD Provider Manual.

These elements have now been incorporated into the guidelines.

The Board believes that the elements listed in the guidelines provide optometrists and providers with increased transparency on the expected quality standard for CPD for the profession.

5. Review of the classification of activity types to ensure emerging technologies can be incorporated into the accreditation process without revising the standard or guidelines

The activity classification structure listed in the current registration standard and guidelines has proven to be complex and confusing for both optometrists and providers. The structure is rigid and does not allow for the incorporation of new technologies, such as interactive webinars.

The Board has amended the structure for the purposes of simplicity and responsiveness to emerging activity types.

6. Remove the national office of the Optometrists Association of Australia from the approved provider list, indicating that activities provided by this office will be accredited by the CPDAC

The Board’s Continuing Professional Development Accreditation Committee (CPDAC) oversees the accreditation of CPD activities for the profession.

The national office of the Optometrists Association of Australia administers this process on behalf of the Board.

The current guidelines list the national office of the Association as an approved provider and therefore capable of accrediting their own activities.

In the interest of integrity and independence of the CPD accreditation process, the national office of the Association has been removed from the list of approved providers. The CPDAC will accredit any CPD activities directly provided by this office.
Attachments

Attachment A: Draft amended *Continuing professional development registration standard*

Attachment B: Summary of changes to the *Continuing professional development registration standard*

Attachment C: Draft amended *Guidelines on continuing professional development for endorsed and non-endorsed*
Draft amended *Continuing professional development registration standard*

**Authority**

This registration standard has been approved by the Australian Health Workforce Ministerial Council (the Ministerial Council) on <insert date> pursuant to the Health Practitioner Regulation National Law (the National Law) as in force in each state and territory, with approval taking effect from <insert date>.

**Summary**

The Optometry Board of Australia (the Board) has established this standard in accordance with section 38(1)(c) of the National Law.

Consumers of optometry services have the right to expect that optometrists will provide services in a safe, competent, ethical manner that meets best practice standards. Continuing professional development (CPD) is the means by which optometrists maintain, improve and broaden their knowledge, expertise and competence, and develop the personal and professional qualities required throughout their professional lives. It involves self-assessment of learning needs and desired outcomes, undertaking a range of activities, and reflection on the activity meeting these learning needs.

All practising optometrists must undertake CPD. This standard sets out the minimum requirements for CPD for optometrists.

**Scope of application**

This standard applies to all persons who hold general or limited registration as an optometrist under the National Law. It does not apply to those holding student registration or non-practising registration with the Board.

**Requirements**

1. Optometrists must complete a minimum of 80 points of CPD activities over two years. This can be met by undertaking accredited, non-accredited activities or a combination of both, as described in the Board’s *Guidelines for continuing professional development for endorsed and non-endorsed optometrists*.

2. Of the 80 points over two years:
   - a minimum of 24 points over two years must be in face-to-face CPD activities,
   - 60 of the 80 points over two years must be in clinical CPD activities,
   - no more than 20 of the 80 points over two years may be obtained by completing activities relating to optical goods and equipment provided by suppliers or manufacturers, and
3. In addition to a minimum of 80 points over two years, all registered optometrists must have completed, within the previous three years, training in cardiopulmonary resuscitation (CPR) provided by or through an approved training provider.

4. Where an optometrist, including a new graduate, has been registered for only part of a registration period, a pro-rata CPD requirement applies.

5. Optometrists who have notified the Board of an absence from practice for the majority of, but not more than, one registration period (1 December to 30 November) do not have to meet the CPD requirements for the time that they are not practising the profession.

6. All optometrists must develop and maintain a CPD portfolio that identifies their learning needs and the type of activities they plan to undertake to meet those needs. In addition, this portfolio should include:
   - for accredited CPD activities, an summary record from the Optometrists Association of Australia, or any other approved provider, of accredited activities undertaken, and
   - for non-accredited CPD activities, the learning objectives of the activity, how it relates to the individual personal CPD needs, and an evaluation of the activities to determine whether the desired outcomes have been achieved.

Compliance

1. Renewal requirements

   All registered optometrists must make a declaration at annual renewal that they have or have not completed the CPD required under this standard. Registered optometrists who fail to make such declaration, or who cannot satisfy the requirements, may be refused renewal of their registration or endorsement for scheduled medicines.

2. Audit

   In order to determine compliance with this standard, the Board may at any time request a registered optometrist provide their CPD records for audit by the Board.

3. Notifications

   The Board may in the course of an investigation arising from a complaint against an optometrist require the registered optometrist provide their CPD records over at least the previous two registration periods for review by the Board.

4. Consequence of noncompliance

   The requirement to complete the CPD under this standard is a mandatory requirement under the National Law. Failure to comply may result the Board deciding to refuse the renewal of an applicant’s registration.

Definitions

Approved training provider is an entity approved by the Board for the purpose of provision of training in cardiopulmonary resuscitation. Details on approved providers are available in the Board’s Guidelines for continuing professional development for endorsed and non-endorsed optometrists.
Cardiopulmonary resuscitation (CPR) is the technique of rescue breathing combined with chest compressions to temporarily maintain circulation to preserve brain function until specialised treatment is available. (Australian Resuscitation Council)

Continuing professional development (CPD) is the means by which optometrists maintain, improve and broaden their knowledge, expertise and competence, and develop the personal and professional qualities required throughout their professional lives. It involves self-assessment of learning needs and desired outcomes, undertaking a range of activities, and reflection on the activity meeting these learning needs.

Accredited CPD activities mean CPD activities that have been accredited by the Board in accordance with guidelines issued from time to time by the Board and published on the Board’s website.

Non-accredited CPD activities mean CPD activities that have not been accredited by Board. Optometrists are able to meet the requirements of this standard by completing non-accredited activities; however, the record keeping requirements are different. (Refer to Guidelines for continuing professional development for endorsed and non-endorsed optometrists.)

Associated documents

The following documents are available on the Board’s website:

- Guidelines for continuing professional development for endorsed and non-endorsed optometrists.

Review

This standard will commence on <insert date of publication after approval>.

The Board will review this standard at least every three years.

Introduction

Continuing professional development (CPD) is essential for optometrists to maintain their competence and develop the personal qualities required to deliver the quality of care that the community expects.

These guidelines have been developed to assist optometrists meet the Optometry Board of Australia’s (the Board) Continuing professional development registration standard. They also provide guidance for providers seeking accreditation of CPD activities.

Continuing professional development activities

Optometrists can meet the requirements by undertaking accredited or non-accredited activities, or a combination of both. There are different points values for the types of activity undertaken (see Table 1). The same points can be allocated to an accredited or non-accredited activity within a specific activity type.

Individual optometrists will have different needs for their ongoing professional development. Optometrists should consider the following when planning their CPD activities:

- Areas of knowledge to improve.
- Identified gaps in both clinical and non-clinical competencies as an optometrist.
- Topics of particular interest or specialisation.
- The accreditation status of the CPD activity and the provider’s ability to provide you with quality education.
- The experience, expertise and qualifications of the presenter(s).
- The location, date and time of the activity, and whether it is available online.
- The format of the activity and whether it includes opportunities to interact with peers.

Clinical activities must deal with ocular conditions, systemic conditions with ocular effects, vision and visual perception, optometric management and/or ophthalmological management.

Non-clinical activities must be relevant to practice and improve the management of patients in some tangible way.

Accredited activities

Accredited CPD activities are those activities assessed as meeting the criteria in Appendix A ‘Criteria for continuing professional development activity accreditation’.

The Board has established a Continuing Professional Development Accreditation Committee (CPDAC) to oversee the accreditation process and determine the ongoing suitability of the criteria used.

Currently the Board authorises the national office of the Optometrists Association of Australia (the Association) to accredit CPD activities and assign CPD points. The Association operates under criteria and guidelines established by the Board. Any CPD activities provided by the national office of the Association will be accredited independently by the Board’s CPDAC.

Providers of accredited activities will give the national office of the Association a list of optometrists who complete the activities. This will enable the national office to compile a report on optometrists’ activities.

Non-accredited activities

Optometrists are able to meet the CPD requirements by completing accredited activities, non-accredited activities or a combination of accredited and non-accredited activities.

Optometrists completing non-accredited activities are responsible for deciding the type of activity and assigning the CPD points as per Table 1. Optometrists do not need to get prior approval from the Board before undertaking non-accredited activities; however they need to maintain records of any activities in accordance with the registration standard requirements.

To demonstrate to optometrists the types of non-accredited activities that would be expected to meet the Board’s quality of education criteria, the Board may from time to time publish a list of such non-accredited CPD activities on its website.

Legal  
Occupational health and safety  
Cultural orientation | 1 point |

\(^1\) Registration in an activity is insufficient; participants must attend in full to meet the requirements of the registration standard.

\(^2\) Refer to Appendix A of these guidelines for further information.
Continuing professional development requirements

All practising optometrists must undertake CPD. The Board has established a registration standard in accordance with section 38(1)(c) of the National Law to set out the minimum requirements for CPD for optometrists (Table 2).

Table 2: Registration standard for continuing professional development requirements

</tr>
</tbody>
</table>
Endorsement for scheduled medicines

Optometrists who hold an endorsement for scheduled medicines under section 94 of the National Law must complete at least 40 points of the 80 over two years in education related to the endorsement.

The Board has developed the following definition (Table 3) for activities related to endorsement to assist optometrists in choosing CPD activities and to provide guidance in the preparation and accreditation of CPD activities:

Table 3: Continuing professional development activities related to endorsement for scheduled medicines

| Prescribing and supplying medicines are stages of therapeutic medication management. |       |
|Therapeutic medication management involves the following stages:    |       |
|   | patient assessment       |
|   | differential diagnosis of all conditions of the eye    |
|   | development of a management plan                     |
|   | appropriate choice of medicines (this may involve writing a prescription, ceasing medicines, dose adjustment, advising on over-the-counter medicine) |
|   | advice to the patient about the appropriate use of the medication |
|   | development of a treatment plan                        |
|   | monitoring outcome                                      |
|   | administration and/or                                   |
|   | sale and supply if required and completing any necessary documentation |

Definition:
A CPD activity ‘relevant to scheduled medicines endorsement’ is an educational activity that meets the learning needs of the optometrist relevant to any of these stages of therapeutic medication management and assists in demonstrating one or more of the therapeutic competencies in the professions’ competency standards.

It is expected that a significant component of the content and at least one of the learning objectives of the activity meet this definition for an activity to be eligible for CPD endorsement for scheduled medicines points.

Cardiopulmonary resuscitation

In addition to a minimum of 80 points over two years, all registered optometrists must have completed, within the previous three years, training in cardiopulmonary resuscitation (CPR) provided by or through an approved training provider.

Training courses registered on the training.gov.au website under training components listing the units of competency for ‘perform CPR’ are nominally approved by the Board. This includes the familiar providers such as:

- Australian Red Cross
- Surf Life Saving Australia
- St John Ambulance Australia
- Royal Life Saving Australia

To find a provider, go to http://www.training.gov.au and click on ‘training components’ under the search page; search for ‘CPR’ and then select the state or territory.

Compliance

Renewal requirements
All registered optometrists must make a declaration at annual renewal that they have or have not completed the CPD required under this standard. Registered optometrists who fail to make such declaration, or who cannot satisfy the requirements, may be refused renewal of their registration or endorsement for scheduled medicines.

3 Optometrists Association Australia Universal (entry-level) and Therapeutic Competency Standards for Optometry 2008 (www.ocanz.org).
Audit
In order to determine compliance with this standard, the Board may at any time request a registered optometrist provide their CPD records for audit by the Board.

Notifications
The Board may in the course of an investigation arising from a complaint against an optometrist require the registered optometrist provide their CPD records over at least the previous two registration periods for review by the Board.

Consequence of noncompliance
The requirement to complete the CPD under this standard is a mandatory requirement under the National Law. Failure to comply may result the Board deciding to refuse the renewal of an applicant’s registration.

Continuing professional development records
All optometrists must maintain up-to-date CPD records.

All optometrists are required to develop and maintain a CPD portfolio that identifies their learning needs and the type of activities they plan to undertake to meet those needs. Additional requirements for accredited or non-accredited activities are listed in Table 4.

<table>
<thead>
<tr>

</table>

Supporting documentation in the form of:
• receipts or other proof of attendance, |
• diary entries, and |
• activity programs/brochures that describe the content and learning objectives of the activity.

The Board will publish CPD portfolio templates on its website to assist optometrists meet this requirement.

Absence from practice
All optometrists practising the profession are expected to meet the requirements of the Board’s Continuing professional development registration standard.

Where an optometrist has been registered for only part of a registration period, a pro-rata CPD requirement applies.

Optometrists who have notified the Board of an absence from practice for the majority of a registration period (1 December to 30 November) do not have to meet the CPD requirements for the period that they are not practising the profession. Optometrists absent from practice a period of time greater than this should refer to the Board’s Recency of practice registration standard.

This temporary absence from practice needs to be associated with special circumstances such as extended leave (e.g. parental leave or long-service leave) or illness. Optometrists are required to complete a pro-rata
level of CPD requirements for any part of the registration period for which they practise the profession. Optometrists absent from practice greater than this should refer to the Board’s Recency of practice registration standard.

Information on how to notify the Board of the temporary absence will be published on the Board’s website.

**Exemptions**

The Board believes the range of activities and the time frame provided to meet the CPD requirements is broad and flexible enough for all optometrists to meet the requirements. However, the Board also appreciates that there are times when exceptional circumstances may make this difficult. In this case an optometrist may apply in writing to the Board for an exemption.

The exceptional circumstances for exemptions will be limited and would only be considered where there is compelling evidence that the circumstances have created a significant obstacle to the optometrist’s ability to complete CPD requirements. Each case would be considered on its merits and, depending on the particular circumstances, the Board may decide upon a full, partial or complete exemption. The Board will also consider the requirements of its recency of practice standard in any application.

As a general principle, financial hardship or remote location are not adequate grounds for a partial exemption as there are sufficient CPD activities in a range of formats available to overcome these obstacles. Evidence of a past history of undertaking CPD activities will be taken into account by the Board when assessing applications for exemption.

The Board will only consider an exemption in one year of any four-year period. The Board is of the view that where an optometrist is able to practise the profession, they also need to complete the CPD requirements.

Information on how to apply for an exemption will be published on the Board’s website.

**Providers of continuing professional development activities**

CPD activities may be provided by a range of providers.

**Approved providers**

The Board has developed criteria for approved provider status (see appendix C of these guidelines) and has published a list of current approved providers at appendix B of these guidelines.

Activities provided by an approved provider are considered to be accredited activities and the approved provider will assign the applicable number of CPD points.

**Other providers**

While it is not a specific requirement, all other providers are eligible to apply for accreditation of their CPD activities by the Board. This will assist optometrists in pre-assessing the standing of any activity. The Board has developed a *Continuing professional development provider manual* to guide providers through the accreditation process.

With the increased demand for CPD, the Board will encourage all providers to expand the availability of their activities to rural and remote practitioners.

**Audit of providers**

The Board may at any time audit the accredited activities provided by CPD providers to assess compliance with the *Criteria for continuing professional development accreditation* listed in appendix A of these guidelines. If it is determined by the Board’s CPDAC that a provider has failed to ensure the delivery of quality education, the provider may be ineligible for accreditation of future activities for a period determined by the Board. The delivery of quality education includes ensuring attendance of optometrists during face-to-face CPD activities.

When applying for accreditation, CPD providers will need to explain how they will monitor attendance and participation during face-to-face activities.
Feedback on activities

The Board is interested in ensuring that there is a range of quality activities for optometrists to meet the CPD requirements.

Optometrists concerned about the quality of the CPD activity that they have undertaken are encouraged to notify the Board in writing of their concerns. Information on this process will be published on the Board’s website.

Definitions

Approved provider means a provider considered by the Board as meeting the criteria listed in Appendix C of these guidelines: ‘Criteria for gaining approved provider status’.

Approved training provider is an entity approved by the Board for the purpose of provision of training in cardiopulmonary resuscitation.

Cardiopulmonary resuscitation (CPR) is the technique of rescue breathing combined with chest compressions, to temporarily maintain circulation to preserve brain function until specialised treatment is available. (Australian Resuscitation Council)

Continuing professional development (CPD) is the means by which optometrists maintain, improve and broaden their knowledge, expertise and competence, and develop the personal and professional qualities required throughout their professional lives. It involves self-assessment of learning needs and desired outcomes, undertaking a range of activities, and reflection on the activity meeting these learning needs.

- Accredited CPD activities mean CPD activities that have been accredited by the Board in accordance with these guidelines and the Board’s Continuing professional development provider manual.
- Non-accredited CPD activities mean CPD activities that have not been accredited the by Board. Optometrists are able to meet the requirements of this standard by completing non-accredited activities but the record keeping requirements are different.
Appendix A: Criteria for continuing professional development activity accreditation

These criteria are to be used by all providers of accredited CPD activities. Further information on the accreditation process is available in the Continuing professional development provider manual published on the Board’s website.

A1 Continuing professional development activity

Providers should review Table 1: Continuing professional development activity types for examples of each activity type. All accredited activities should be clinical or non-clinical.

Table A1 provides guidance as to nature of activity, and point allocation, additional to the descriptions of activities in Table 1 earlier.

Clinical activities must deal with ocular conditions, systemic conditions with ocular effects, vision and visual perception, optometric management and/or ophthalmological management.

Non-clinical activities must be relevant to practice and improve the management of patients in some tangible way.

Table A1: Specific criteria for accreditation of activity types

<table>
<thead>
<tr>
<th>Activity type</th>
<th>Specific criteria</th>
<th>Points allocated per learning hour*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Face-to-face (clinical)</td>
<td>Must be in real time (i.e. live).</td>
<td>2 points OR 3 points if accompanied by an assessment component (A5) **</td>
</tr>
<tr>
<td></td>
<td>Allow interaction between presenter and participant and between participants.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Practical, small group workshops should have a presenter to participant ratio of 1:20.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>For activities accompanied by a meal, only the presentation component will be counted for the purpose of accreditation.</td>
<td></td>
</tr>
<tr>
<td>Independent learning (clinical)</td>
<td>Must adhere to the additional criteria for independent learning (A6) as well as all other criteria</td>
<td>1 point OR 2 points if accompanied by an assessment component (A5)</td>
</tr>
<tr>
<td>Non-clinical #</td>
<td>Non-clinical education relevant to practice includes activities that can improve the management of some patients in a tangible way; these activities are awarded one point per hour, with a maximum of 10 points per year; for example, business management, law, psychology, foreign languages, first aid, occupational health and safety and dietetics.</td>
<td>1 point</td>
</tr>
</tbody>
</table>

*Points allocated are based on an activity of one learning hour duration (or equivalent for independent learning activities).
** Small group workshops allocated 3 points per hour, with or without assessment, if ratio met.
# Non-clinical activities are delivered as per clinical activities (conferences, seminars, webinars, workshops, audio, DVDs and podcasts); however, will only be allocated 1 point per hour.
A2 Quality of education

The content of the activity must reflect accepted optometric practice based on critical appraisal of the scientific literature. Activities promoting theories and techniques that are not supported by scientific evidence, nor generally accepted by the optometric profession will not be eligible for accreditation. Any materials presented should be current, relevant and at an appropriate level of education for Australian optometrists. It is unlikely that a course would be accredited if it was not intended for optometrists or other registered health practitioners.

The educational format should reflect research-based, proven, best educational practice principles. In order to qualify for accreditation, providers will be encouraged to review their presentations and adopt progressive, up-to-date educational principles. Adult learning theory and research suggests that effective CPD activities should adopt innovative methods of presentation such as hands-on learning opportunities, peer-based study groups, small breakout sessions during large lecture-based presentations, and more interactive online seminars.

Activities should be engaging and effective in delivering the stated learning outcomes. Providers may be requested to make improvements to the delivery or content of any materials in order to have their activity accredited.

The Board may conduct random audits for educational quality. If it is determined by a committee established by the Board that a provider has failed to ensure the delivery of quality education, the provider may be ineligible for accreditation of future activities. The delivery of quality education includes ensuring attendance of optometrists during face-to-face CPD activities.

When applying for accreditation, CPD providers will need to explain how they will monitor attendance and participation during face-to-face activities.

With the increased demand for CPD, the Board will encourage providers to expand the availability of their activities to meet the needs of optometrists living in rural and regional areas.

A3 Ethical and legal standards

CPD activities must comply with the Board’s Code of Conduct for optometrists and accepted ethical standards expected within health services and higher education providers.

When presenting information about patients (e.g. case reports), care must be taken to ensure that the identities of patients are not disclosed. Where this is not possible (e.g. in the use of images), the informed consent of patients must be obtained. Providers may be asked to provide evidence of this when applying for accreditation.

Content that is subject to copyright should not be presented unless relevant permissions have been sought and granted.

A4 Learning objectives

The Board is interested in assisting optometrists to participate in a range of CPD activities that are both relevant and engaging for individual optometrists' development. In choosing CPD activities, optometrists are required to assess their personal CPD learning needs and the desired outcomes of CPD activities.

To assist optometrists to make relevant choices, it is important that CPD activities list the expected learning objectives for all accredited CPD activities. Optometrists will then be better placed to make decisions on what CPD to undertake in line with their own self-assessed needs.

Providers applying for accreditation should provide a minimum of three learning objectives for each hour or equivalent of activity.

Providers should refer to the Continuing professional development provider manual information on the development of learning objectives.

A5 Point calculation

One of the outcomes of the accreditation assessment process is the allocation of CPD points. The number of points available for each CPD activity group is listed in Table 1 of these guidelines.
For a CPD activity to be accredited, it must be of one hour duration (or equivalent for independent learning activities). This hour may be segmented by use of multiple speakers.

Activities that do not meet this minimum duration of one hour will not be accredited.

Further information on the calculation of the CPD points is included in the *Continuing professional development provider manual* published on the Board’s website.

### A6 Assessment

Both face-to-face activities and independent learning activities are eligible for additional allocation of points if there is an assessment included.

For this additional point to be allocated, the assessment component must include a feedback mechanism to participants at the time of assessment or a reasonable time after the activity so they can review their results against their learning objectives.

Points will be allocated for participation in the assessment component and not on the result. The Board believes any assessment provides optometrists with the opportunity to consider the results in the context of their CPD plan.

There is no compulsion to include assessment with any CPD activity. In deciding whether assessment will be included, providers should consider the principles listed in Table A2.

#### Table A2: Principles for inclusion of assessment

1. All assessment should be directly linked to the learning objectives of the activity.
2. Inclusion of assessment should add value and quality to the activity.
3. Assessment should only be included at the time of the presentation if it does not detract from the presentation or distract participants.
4. Inclusion of the assessment should not reduce opportunities for questions from a presenter or opportunities for discussion, including interaction with peers.
5. Providers, or examiners engaged by providers, are expected to have the appropriate skills and experience to design appropriate assessment questions.
6. Assessment should generally be in the form of multiple choice questions (MCQs)\(^4\).
7. Assessment style and conduct remains the responsibility of the CPD provider.
8. Assessment questions need to be included with the application for accreditation.
9. There should be six questions for each learning hour of face-to-face activity.
10. There should be at least 10 MCQs for each learning hour (or equivalent) for independent learning activities.

### A7 Independent learning activities

As well as the criteria listed in A1 – A6 and A8, independent learning activities (not conducted face-to-face in real time) are required to meet the following criteria.

Distance education should include information that is predominantly of overall relevancy and at an appropriate level of education for Australian optometrists. Where international terms are used, a cover note or explanation should be given at the start of the activity.

For every learning hour, it is expected that each activity will include at least four A4-size pages of optometry-related text or equivalent amount of content delivered via audio or visual means.

There should be at least 10 MCQs for each learning hour (or equivalent) for independent activities.

The use of colour, diagrams, graphics, audio and visual demonstrations are preferred.

---

\(^4\) Guidelines for designing multiple choice questions are included in the Board’s *Continuing professional development provider manual.*
Providers may be requested to make improvements to the format, presentation or content of any materials prior to accreditation being granted.

Initial accreditation approvals for independent learning activities will be valid until the end of the current registration period.

If a provider wishes to present a course again after its approval period has expired, they will have to submit another application.

Points should not be allocated to participants who have completed the same activity in the previous registration period.

A8 Feedback

It is vital for the ongoing provision of quality CPD activities that providers seek feedback from participants for any accredited CPD activity. The feedback may take many formats and may occur at the time of the activity or after the activity. Feedback on the quality of the CPD activity should:

• be timed to encourage optometrists to provide quality feedback, and in a format that encourages quality feedback
• check if the optometrist believed the activity was aligned with the stated learning objectives
• provide optometrists with the opportunity to reflect on how the activity met their learning needs, and
• be distinct from feedback on the venue and facilities.

Providers are required to outline the feedback methodology when applying for accreditation, and a report is required when submitting course completion details.

A sample feedback form and guidelines about feedback methodology will be published on the Board’s website.
Appendix B: Approved CPD providers

Continuing professional development activities provided by the following organisations are recognised as meeting the criteria for CPD activity accreditation:

- The University of Melbourne, Department of Optometry and Vision Sciences
- Queensland University of Technology, School of Optometry and Vision Sciences
- University of New South Wales, School of Optometry and Vision Science
- The University of Auckland, Department of Optometry and Vision Science
- Optometrists Association Australia – State Divisions
- Australian College of Optometry
- Centre for Eye Health, New South Wales

---

5 Activities provided by the national office of the Optometrists Association of Australia will be accredited independently by the Board’s Continuing Professional Development Accreditation Committee.
Appendix C: Criteria for gaining approved provider status

To be considered for approved provider status and to maintain this status, an organisation must:

- have education of optometrists as one of its principal activities,
- have adequate expertise in providing quality education at a standard that is appropriate for Australian optometrists,
- have a proven record of providing quality optometric CPD and a history of complying with the criteria for CPD activity accreditation, and
- notify the Board of any changes to the organisation's details that were provided to the Board during the application process.

Additionally, an approved provider must not:

- have any obvious conflicts of interest that may affect the quality or impartiality of the educational content; organisations such as optical wholesalers and ophthalmic surgery centres generally will not be eligible for approved provider status,
- unreasonably prevent optometrists from enrolling in and attending their CPD activities; unreasonable restrictions include employment status and geographic location, and
- delegate the task of developing or coordinating the educational content of its CPD activities.

The register of approved providers will be reviewed annually; approved provider status is granted at the discretion of the Board and can be revoked at any time.
