Dear Sir / Madam

I am a practising optometrist with over 10 years experience in clinical practice

I would like to express my support for the OAA's response to the OBA Consultation

I personally have no intention to become therapeutically endorsed  
My preference is towards a more holistic approach to treating patient's eyes and vision

I am comfortable referring patients to other professionals as appropriate if therapeutic Tx is indicated

If at any time in the future therapeutic endorsement should become mandatory my preference would be towards a change in my career  
Thank you for this opportunity to voice my opinion
